CAMPOS · THE TILL

CamPOS

The till for Cambodian bars, cafés and restaurants

Orders, tabs on tables, the kitchen, KHQR, stock and loyalty on one tablet. Built for Noisy Chili in Phnom Penh, and in use there every night.

- **Happy hour runs itself** PRO
  Specials switch on and off by the clock, and the till shows what they saved.
- **Tabs on tables**
  Several tabs a table: split, merge, move, or pay part now.
- **The kitchen board** PRO
  Food reaches the kitchen the moment it is rung, and the bar sees when it is up.
- **KHQR at the till** PRO
  Any Cambodian bank app. The sale records itself; the money goes to your own ABA account.
- **When the internet drops**
  It keeps selling, and catches up by itself when the connection is back.
- **Cash and shifts**
  A float, money in and out, and the count at close against what the till expected.
- **Stock** PRO
  Kegs, bottles and grams, drawn down by every sale; par levels and stocktakes.
- **Regulars and gift cards** PRO
  Points, stamp cards, gift cards and house accounts.
- **Reports**
  Any days you like (the last 31 on Free), by hour, product and staff, and as CSV.

The order before it is paid, with what the specials took off.

And the rest

+ Staff PINs and roles: staff, managers, the kitchen
+ Add-ons and choices on any item
+ One bill paid several ways: cash, ABA, a gift card, points
+ Voids, refunds and comps, each with a reason
+ Several venues, one account PRO
+ A data API for your own tools PRO

HOW STARTING WORKS

01
Ask for a trial
Tell us about your venue. It takes a minute.

02
We set you up
You get an invite to your account, and we help you put your menu in.

03
Pair a tablet
Open the till in any tablet's browser and type the code from your account.

04
Free to start
Free is never invoiced. On Pro, your first invoice comes after the free month: tell us before then if it is not for you, and you pay nothing.
